

## **Electronic circuitry controls our lives – from the factory floor to the home – from farm machinery to the supermarket refrigerator**

It's hard to imagine life without electronic circuitry and extremely annoying when it doesn't work. And then there's industry!

Electronic circuitry needs to be protected from dust, dirt, moisture, humidity and water damage, and with Sentry Circuit Shield, with its 21st century covalent molecular bonding system not only offers excellent protection, but is also ideal for replacing standard conformal coatings

### **Tough, durable, environmentally sound and free of carcinogens**

With less than 100g/L VOC it outperforms the most stringent air-quality controls in the U.S. Sentry also measures as being carcinogen free as defined by California Prop 65.
